

Fabric Coasters Hexagon Shape Coaster

Using this Hexagon Pattern: Cut 7 Hexagons ~ matching sets or contrasting fabrics/scrappy. (I love 7" squares to cut the Hexagons).

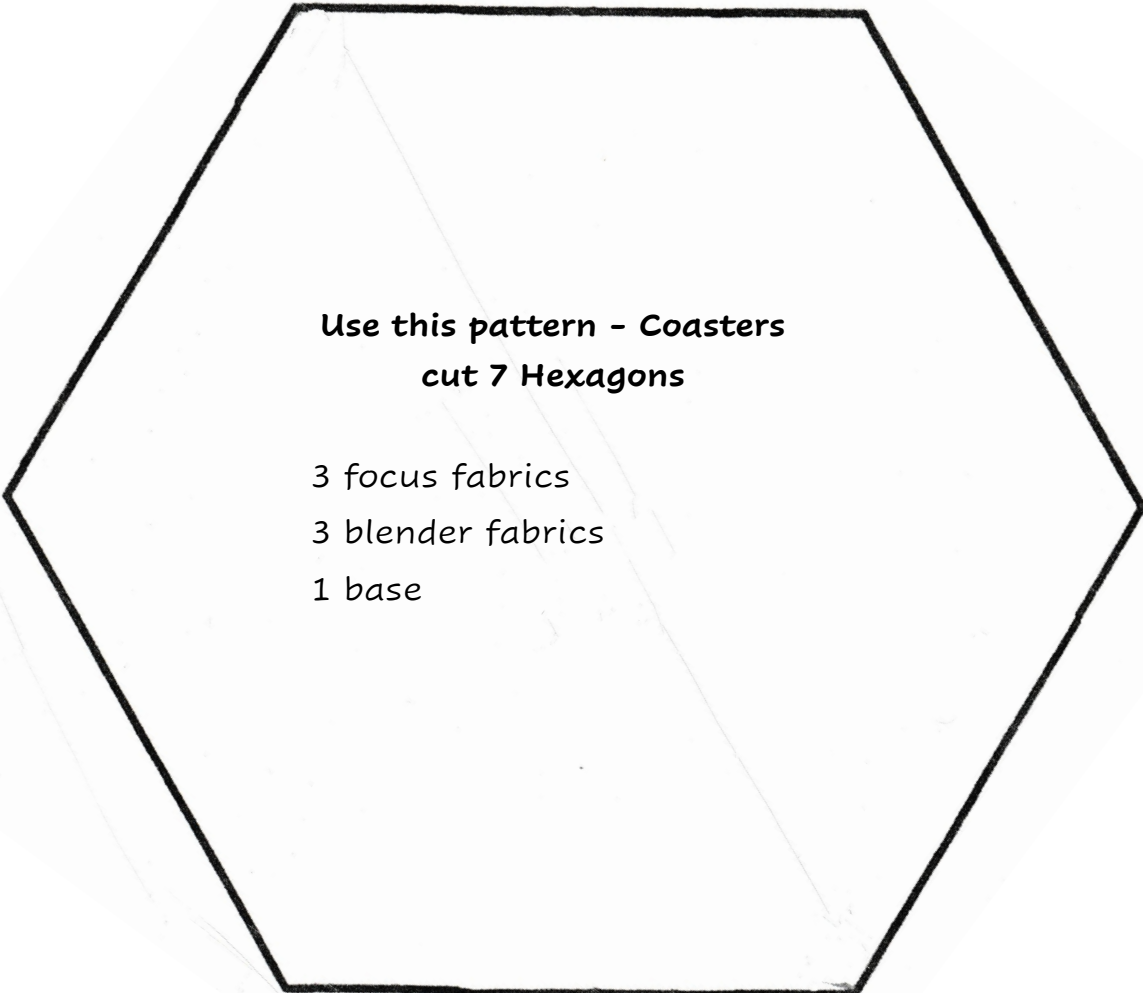

- Fold and press 6 Hexi's in half aligning flat sides (not points).
- As with similar fabric coasters, place one flat 'face up' as the bottom and make sure the folds are to the center and raw edges aligned to the outside edge. Distribute the other 6 around each side and tucking in the last one under the first. Pin or clip in place.
- Starting on a side (which is short), sew a $\frac{1}{4}$ " seam allowance around the entire Hexi. As with other fabric coasters, take ONE diagonal stitch/back stitch as you sew around each corner.
- Be sure to backstitch as you finish sewing all the way around. Trim each corner.
- Reaching through the center folds, gently turn the project inside out, poking out the corners. Press. Optional: Topstitch around the perimeter.

CUT 7 Hexagons

This is a suggested size, you can make it a tad larger if you wish.

FYI— If you are cutting a LOT of hexi's you might consider cutting out a cereal box cardboard shape, glueing this shape to it and putting medical tape on the back so the pattern won't slip while you cut them out.
