

# Fabric Coasters

Compiled by Su Scott

Inspired by so many crafty sewers.....

**Fabric Coasters:** Use 5, - 5" coordinating/contrasting fabric squares. 5" is a guideline size. Using one as the base, fold and press the other four in half (diagonally or book type fold).

Start with the base square, 'right side' up. With the raw edges aligned, place each folded square around each side. The FOLD is in the center. One square for each side and each overlaps the previous square. The last square tucks under the first square. Pin or clip each side.

Starting on a side not the corner, sewing a 1/4" seam allowance, sew ALL the way around the coaster. At each corner, take ONE diagonal stitch and backstitch once to reinforce that area. Trim the corners. Turn inside out and gently poke out each corner. Press well. Even Hexagon 'shapes' will work!
